

GREAT RIVER GREENING GREENING SOLUTIONS FORESTS/NATURAL AREAS

BEFORE

Restore native woodlands and natural areas

- We'll remove pesky buckthorn and other invasive species crowding out your natural areas.
- Afterwards, we'll restore and enhance your areas with native plants, beautifully improving habitats and forest health.

Custom Solutions

- Work with our ecologists to determine the unique challenges on your land, options for removal, and the variety of enhancements available, from basic seeding to full-scale restoration.

your woodlands and
natural areas solution!

AFTER

"With over 26 miles of Mississippi River riverfront, the City of Saint Paul relies on Great River Greening to help inform, guide, and lead restoration projects within the river corridor--and beyond."

--Michael Hahm, Director
Saint Paul Parks and Recreation
